## What are financial boiler rooms?

**They are entities that advertise investment services without authorisation**

In most cases they are covers aimed at conning investors into handing over their money

They promise high returns that they cannot deliver or guarantee

Sometimes, when they are unable to justify losses, they simply **disappear**

**REMEMBER: THEY ARE DANGEROUS**

We could all fall prey to them, since they are often very elaborate frauds which are ostensibly credible

Report to the CNMV any suspected fraud incident and report what happened to the Police or the corresponding Court.
